

## ENVIRONMENTAL, QUALITY AND HEALTH AND SAFETY INTEGRATED POLICY

Llorens|gmr is a company dedicated to the transport and integral management of industrial waste, both hazardous and non-hazardous. Our activity includes all the necessary processes for this activity: storage, collection, transportation, separation, recovery, recycling...

The management of Llorens|gmr bases its quality, environment and risk prevention policy on the following principles:

- Comply with pertinent legal requirements, especially those of an environmental nature, and with any type of specification acquired by the company with our customers and stakeholders.
- Protect the environment and prevent pollution, by reducing the impacts caused by our company's activities or services, such as the reduction of CO2 or zero landfill emissions, selecting at all times the best possible strategy for waste management.
- Communicate established quality and environmental criteria to all of our structure levels, as well as to our suppliers and customers , , .
- Guarantee a continuous improvement process that allows to perfect the company's operation and management services, in order to increase its efficiency and efficacy, as well as the satisfaction of our customers.
- Develop continuous training programmes adapted to the needs of our workers, as well as to our customers and/or suppliers who wish to do so.
- Promote and establish a good working environment, in which the prevention of occupational risks and health is a fundamental piece to minimize and eliminate existing occupational risks.
- Have a Corporate Social Responsibility policy that facilitates participation in society (donations, collaborations with entities..)
- Project an image of modernity, future, and professionalism.
- Promote R&D in the field of waste management.
